VENANTIUS SEAN ARDI NUGROHO

+62 85956659510 | seannugroho8@gmail.com | Portofolio | LinkedIn | GitHub

Education

University of Electro-Communications Tokyo, Japan
Research Student *2025 – 2026*

- Research focus: High Performance Computing
- Scholarship: Full JASSO Scholarship

Bandung Institute of Technology (ITB) Bandung, Indonesia
B.Sc. in Informatics *2022 – Present*

- GPA: 3.49 / 4.00
- Expected graduation: December 2026
- Relevant coursework: Algorithms & Data Structures, Database Systems, Operating Systems, Computer Organization & Architecture, Computer Networks, Parallel & Distributed Systems, Artificial Intelligence, Machine Learning, Object-Oriented Programming, Web Application Development

Publication

Nugroho, Venantius Sean Ardi; Miwa, Shinobu
Impact of Inference-Time Reasoning on LLM-Based Parallel Code Generation: a Case-Study of Kokkos
ISC High Performance 2026, March 2026.
Published as research conducted at the University of Electro-Communications.

Work Experience

P.T. Doval Sejahtera Investa Bandung, Indonesia
Full-Stack Engineer *March 2026 – Present*

- Developed and maintained full-stack web applications based on business requirements and company needs.
- Designed and implemented end-to-end application features, covering both frontend and backend development.
- Developed internal web-based applications for tracking employee man-hours and managing invoice reimbursement processes.

P.T. Teleakses Solusindo Jakarta, Indonesia
Software Developer Intern *June 2025 – August 2025*

- Developed a high-performance backend for an Audit Trail system in Go, achieving throughput of over 3,000 requests per second.
- Built a mobile frontend using Flutter for a client-facing application.
- Migrated a legacy website to a modern Vue.js-based web application.

Saint Theodore Church Bandung, Indonesia
Full-Stack Web Developer *July 2024 – August 2024*

- Independently developed a web application for a church event using Node.js and React.
- Designed, implemented, and managed the application database using MySQL.
- Deployed and maintained the web application through cPanel.

Leadership & Organizational Experience

Pemilu HMIF 2025 Bandung, Indonesia
Head of IT Department *October 2024 – March 2025*

- Led a team of 10 developers as Project Manager to build an election web application.
- Contributed as a Full-Stack Developer by developing the voting API using Next.js.
- Deployed the application using Vercel.

Pemilu HMIF 2024 Bandung, Indonesia
Front-End Developer *December 2023 – March 2024*

- Developed multiple React pages for the election platform.
- Built reusable React components to support the web application interface.

Highlighted Projects

Finos (2026)
Developed a web application using Go as a Backend and Next JS as a Frontend, hosting both backend and frontend for free
Link: https://finos-kappa.vercel.app/

Pemilu HMIF Web Application (2025)
Developed a web application using Next.js (T3 Stack) to support the student election process for STEI-K ITB.
Link: https://pemilu.hmif.dev/

Artificial Intelligence Model for Network Security (2024)
Built machine learning models from scratch in Python, including K-Nearest Neighbor, Naive Bayes, and Decision Tree algorithms, to detect whether a network was under attack. Also compared the custom implementations with scikit-learn models.
Link: GitHub Repository

Python-Based Database Management System (2024)
Developed a database management system from scratch in Python as part of a college group project.
Link: GitHub Repository

Linux-Based Operating System (2024)
Built a command-line operating system from scratch using C and Assembly in a college group project.
Link: GitHub Repository

Technical Skills

Programming Languages: Go, Python, Java, C/C++, TypeScript, SQL
Frontend: React, Next.js, Vue.js, Flutter
Backend: Fiber, Node.js, REST APIs
Databases: PostgreSQL, MySQL
Tools: Git, Docker, Linux

Language Proficiency

English: IELTS 8.0
Certificate: View Certificate

Japanese: JLPT N3
Certificate: View Certificate

Indonesian: Native Speaker
